ViiV Injectables

Alternative Site of Care (ASOC)

Utilizing ASOCs allows you to prescribe ViiV Injectables without acquiring or administering the medication in your office—while you continue to manage your patients' care. ASOCs confirm patients' coverage and coordinate prior authorizations. Network ASOCs have dedicated teams trained to support ViiV Injectables.

How to Utilize an ASOC to Administer ViiV Injectables

1 HCP Referral

Complete a referral form to connect your patient with a ViiV Network ASOC.

2 Benefits Verification

The ASOC confirms coverage and coordinates prior authorizations (PAs) on your behalf.

3 Patient Onboarding

A licensed clinician from the ASOC reaches out to your patient to explain what to expect. This personalized call helps patients feel informed and supported from the start.

4 Scheduling

The ASOC schedules the injection appointment with your patient and provides your office with the details to ensure you remain informed throughout the process.

5 Administration

The ASOC administers the injection and schedules follow-up appointments. Your patient will receive appointment reminder calls before each injection and you will be provided injection appointment details to remain informed.

Your Patient Remains Your Patient

After each visit, the ASOC updates your office with the status of your patient. You remain the central point of care for your patient.

If you have any questions about using an ASOC for ViiV Injectables, contact your ViiV representative for more information.
